

# Participatory Video and Most Significant Change techniques

**Bali, Indonesia  
11 – 14 September 2017**

# Introduction

Are you looking for innovative and participatory ways to strengthen Monitoring & Evaluation programmes? CIRCLE Indonesia and ResultsinHealth (RiH) are organising a four-day training that will provide you with knowledge and hands-on skills in conducting Participatory Monitoring and Evaluation (PM&E) using Participatory Video and Most Significant Change (PVMSC).

## Participatory Monitoring and Evaluation

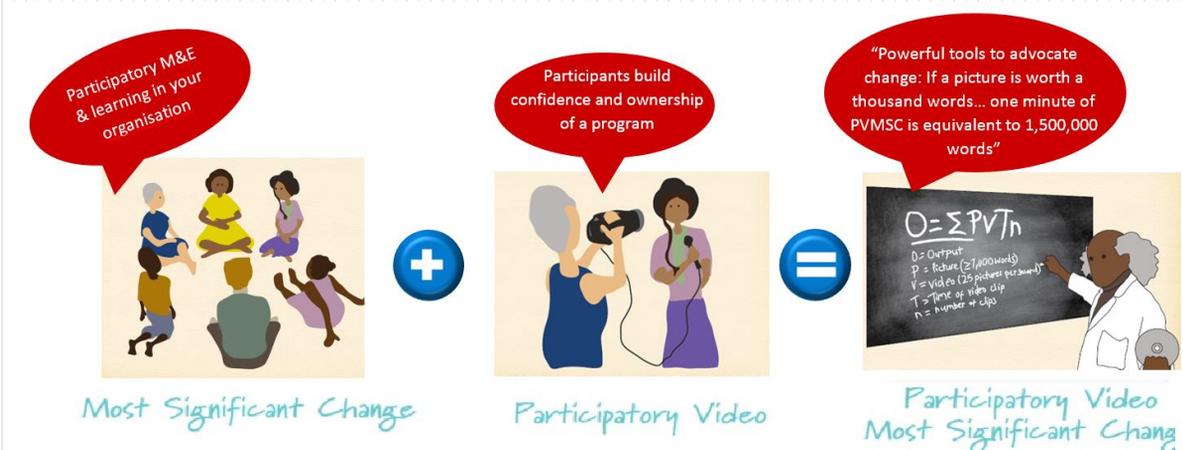

Participatory Monitoring and Evaluation (PM&E) is an important management tool that involves stakeholders and beneficiaries to help track programme progress and facilitate decision-making processes in an intervention. By employing the right M&E tools to assess your work, your organization can design programme and activities that are not only effective and efficient, but also produce powerful results for the community.

## Participatory Video

Participatory Video (PV) integrates a set of techniques to involve a group or community in shaping and creating their own movie. Making a video is fun, easy and achievable. In addition, it is a great way of bringing people together to explore issues, voice concerns, or tell stories.

## Most Significant Change

Using Most Significant Change technique, or "monitoring without indicators", is a qualitative and participatory form of M&E, based on the collection, systematic selection, and analysis of stories of changes resulting from development activities

- Credit image: Asadullah, S. and Muniz, S. (2015) *Participatory Video and The Most Significant Change. A guide for facilitators*. InsightShare, Oxford, UK. Link: [bit.ly/2-PVMSC-toolkit](http://bit.ly/2-PVMSC-toolkit)

Combining these two methods helps to identify significant aspects of an intervention in a participatory manner and gives stakeholders an increased sensitivity to the impact of interventions on beneficiaries.

PVMSC is not a stand-alone tool; it can be used in addition to traditional M&E methods to increase the understanding of intervention outcomes

## Training Objectives

This training will equip participants with knowledge and hands-on skills, including:

- A basic introduction to M&E, including Participatory M&E
- Conducting participatory monitoring and evaluation using a combination of Participatory Video and the Most Significant Change Technique
- Learning to conduct participatory analysis of MSC stories
- Learning to integrate PVMSC in an M&E system

## What the training will cover

The PVMSC training is a combination of theory and practice to provide participants with knowledge on PM&E and hands-on technical skills and knowledge to use a combination of PV and MSC (PVMSC).

Topics addressed in the training include the concepts and theory of Participatory M&E, MSC theory, basic skills in handling a video camera and sound equipment, preparing the equipment for a film shoot, the practical steps for implementing PVMSC, facilitation in the selection and screening of the produced film, and integrating PVMSC in an M&E framework.

By the end of the training, participants will be able to produce a short movie of a significant change story

## Participants

This training is organised for M&E practitioners, programme coordinators/managers, researchers, development workers, facilitators, participatory video practitioners and those curious and interested to learn about applying participatory techniques to evaluate social change projects and programmes.

# The Facilitators

## Rizal Malik

Rizal has held management positions at several INGO's such as Oxfam Great Britain, Oxfam Hong Kong, along with the UN and World Bank. As an advisor, he has worked with the Government of Indonesia on social policy, poverty reduction strategies, corruption prevention, governance reform and consolidation of democracy in Indonesia. Furthermore, Rizal has been working as an evaluation consultant for USAID, CIDA/GAC, GIZ, Oxfam and Action Aid and facilitated trainings in monitoring and evaluation organized by CIRCLE Indonesia

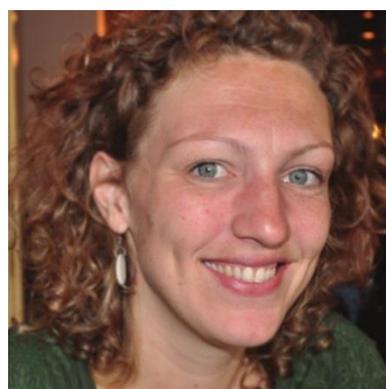

## Nur Hidayati

Nur is a Programme Officer at ResultsinHealth responsible for the Monitoring and Evaluation (M&E) portfolio. She has expertise in various public health monitoring and evaluation methods, with a specific focus on qualitative and participatory methods. She has used MSC in research and for M&E in various projects in the Asia Pacific, Europe and Africa. Nur has extensive experience in facilitating MSC training courses, implementing MSC as part of M&E, and training project staff.

## Tessa Steenbergen

Tessa is a documentary filmmaker and experienced PV trainer. She has a background in development sociology and is passionate about visual storytelling. Over the past 7 years she has trained various groups in PV. She supports organizations around the world in applying PV in projects and programmes, in particular as a tool for M&E.

# Dates, Venue and Fee

## Dates

11-14 September 2017

*Sign up NOW!*

## Venue

**Rama Beach Hotel.**

Jl. JenggalaTuban, Kuta,  
Kabupaten Badung, Bali 80361 Indonesia  
Language: English

## Fee

**Early bird registration (before 31 July 2017) US\$ 1250**

**Normal price (after 31 July 2017) US\$ 1400**

The fee includes lunch and the training package, but does not include accommodation. Participants will be responsible for organising their own accommodation, visa and travel to/from the training venue.

Please note that:

- The training will take place with a minimum of 15 participants.
- Registration closes 15 August 2017.
